Attogether 40 children were asked what their favourite drink is.

How many children chose **cola**? 20
How many children chose **orange**? 10
How many children chose **lemonade**? 5
How many children chose **milk**? 5

Which drink is the most popular? **cola**

Which drinks are the least popular? **lemonade milk**

Imagine now that **120** children were asked but the pie chart stayed exactly the same. How many children chose each drink this time?

Cola

The image shows a Zoom meeting interface. The main window is a whiteboard with the following content:

- Question 1: How many children chose green? 5 (with a checkmark)
- Question 2: How many children chose purple? 5
- Question 3: Which colour is the most popular? blue
- Question 4: Which colours are the least popular? green and purple
- Text: Imagine now that 80 children were asked but the pie chart stayed exactly the same. How many children chose each colour this time?
- Answers:
 - Blue = 40
 - Red = 20
 - Green = 10
 - Purple = 10

The chat window on the right shows a list of attendees and a chat history with messages like "Good attempt" and "Good job". The Zoom toolbar at the bottom indicates "Time Remaining: 00:35:39".
